

## Shadows Walk Dance Program for Robots

Dances are like algorithms: sequences of instructions you must follow exactly to get the right effect.

If a robot is to dance then you need to write a program of the steps. Here is a dance program for the Shadows' Walk dance steps. They are best done while playing air guitar.

Can you pretend to be the robot and follow it yourself?

If you can program in Scratch then perhaps you can program a sprite to do this dance too.
