

## Origami Algorithms: Bunny

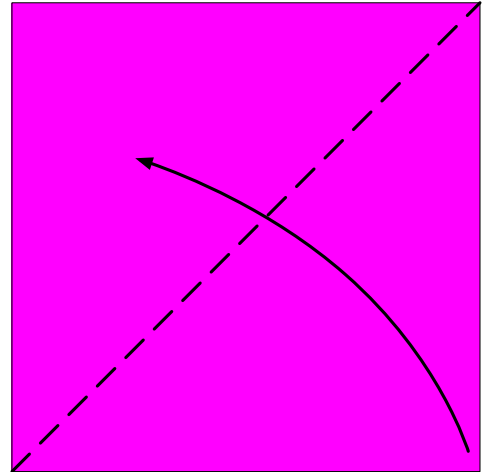

Algorithms are steps that, to work, must be followed precisely and in the right sequence. Can you follow the steps to make this Origami Bunny?

### STEP 1

Take a square piece of paper and fold it diagonally to make a triangle.

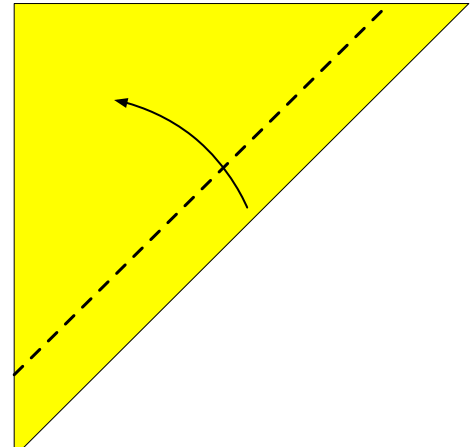

In Origami a dashed line means make a 'valley fold': fold upwards along the dashed line to make a mountain valley shape then flatten down.

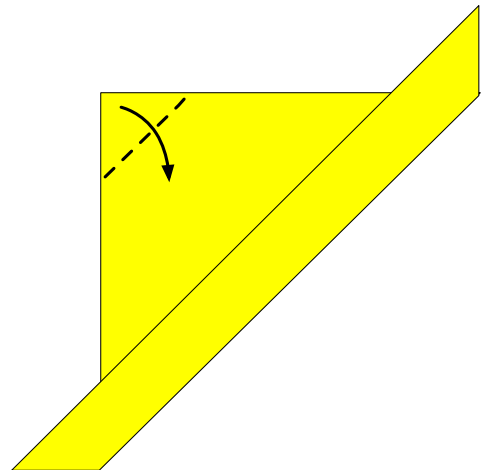

### STEP 2

Fold up a strip along the base of the triangle to make a rain hat like shape

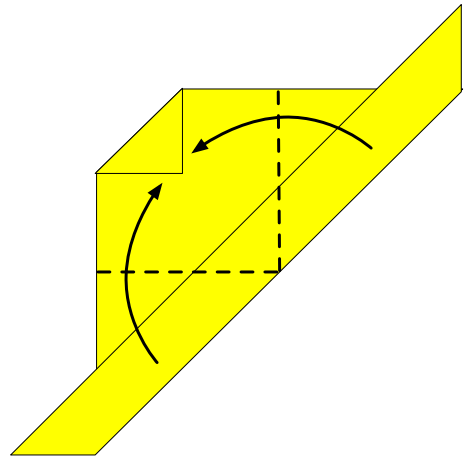

### STEP 3

Fold over a triangle at the top.

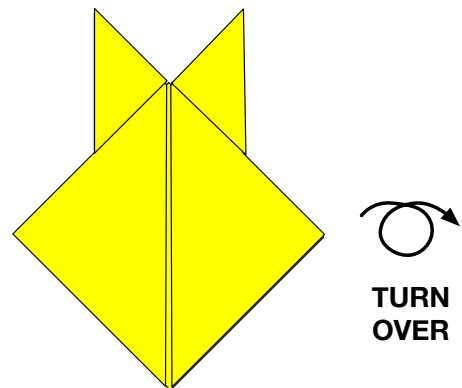

**STEP 4**

Fold the sides up to make ear like shapes at the top.

**STEP 5**

Turn your shape over.

**STEP 6**

Draw on eyes, a nose and a mouth (or use googly eyes and a pom-pom if you have them). You have finished your bunny.
